1. System Requirement

"Acememo" application can run on any Android device

Minimum: Android 4.0

Target: Android 4.3

2. Introduction

"Acememo" is a mobile game application developed specifically for the community facing short term memory problems. The application aims to improve short term memory by having the user to memorize a number of pairs of people and things they like. The pairs are generated using Facebook graph API. With real-life people, Acememo will be able to provide a stimulating game therapy session.

3. Installation

1. Download Acememo.apk file
2. Run Acememo.apk file to initiate installation
3. Prompt ask "Complete action using" choose Package installer
4. Start Installation

Note: The option "Settings -> Security -> Allow installation of apps from unknown sources" must be enabled
